Education

St. Joseph University, Bangalore

Master of Computer Science

Sep 2021 – May 2023

7.5 CGPA

Morning Star Jr. and Degree College, Phirangipuram

Bachelor of Computer Science

Jun 2016 – May 2019

6.5 CGPA

Morning Star Jr. and Degree College, Phirangipuram

Intermediate

Jun 2014 – May 2016

5.8 CGPA

Experience

Oracliumai

Front End Developer

May 2026 – Jul 2026

Banglore, Karnataka

- Developed responsive and scalable web applications using **React.js, TypeScript, JavaScript, Tailwind CSS, Framer Motion, and Redux Toolkit**, creating reusable UI components and implementing Dark/Light theme support with Context API and Local Storage.
- Built and integrated multi-step onboarding flows, authentication, protected routing, form validation, and REST APIs using Axios, including searchable Country/City selection with debounced API calls and efficient state management.
- Created reusable UI components including Buttons, Inputs, Cards, Loaders, Modals, and Form Components. Optimized frontend performance and code efficiency, enhancing application speed, maintainability, and user engagement.

Mark Anthony ventures

Front End Developer

Mar 2024 – Nov 2025

Banglore, Karnataka

- Developed dynamic, responsive, and scalable UI components using **React.js, Redux Toolkit, HTML, CSS, Bootstrap, and Tailwind CSS**, ensuring an optimized and consistent user experience across all devices.
- Implemented **Redux Toolkit for efficient state management, isolating and centralizing application data** for efficient backend-frontend communication, optimizing data flow and performance.
- Enhanced UI/UX by **optimizing component performance**, improving page load speed, and ensuring cross-browser compatibility.

Ace Web Solutions

Front End Developer

May 2023 – Dec 2023

Banglore, Karnataka

- Developed and styled web interfaces using **HTML, CSS, Bootstrap, and JavaScript**, focusing on responsiveness and user-friendly design.
- Gained hands-on experience with **React JS** by building dynamic components, managing state, and integrating APIs for real-world applications.

Projects

Real Estate Portal (User Side) | React.js, Redux Toolkit, Tailwind CSS, Google Places API

- Developed a **responsive property portal** with features like **favorites, share options, WhatsApp integration, and mortgage calculator modal**.
- Implemented **location- and city-based search, unit type filters, and Essentials section (Hospitals, Schools, ATMs, Airports)** using Google Places API.
- Enhanced performance with **lazy-loaded components** and improved UX with **animations and responsive design**.

Technical Skills

Languages: HTML5, CSS3, JavaScript

Technologies / Frameworks: React.js, Vite, Micro-Frontend, Ajax, Tailwind CSS, Bootstrap, Framer Motion, MUI, RESTful APIs, Redux (RTK), Axios

Developer Tools: VS Code, Git & GitHub, Git Bash, Chrome DevTools

Soft Skills

Problem Solving: Strong analytical and debugging skills for efficient issue resolution.

Collaboration: Experience working in cross-functional teams with developers, designers, and stakeholders.

Communication: Effective verbal and written communication for documentation and teamwork.

Adaptability: Quick learner, able to adapt to new technologies and industry trends.
